

Installing The Tailgate

94

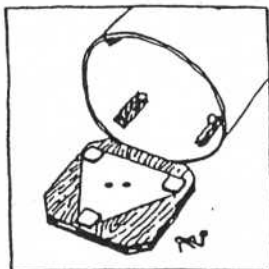

Screwing one of the mounting blocks securely in place.

95

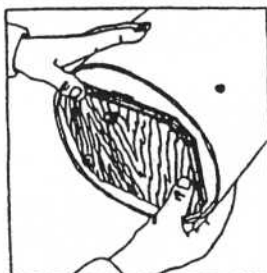

Screwing in the other three blocks.

96

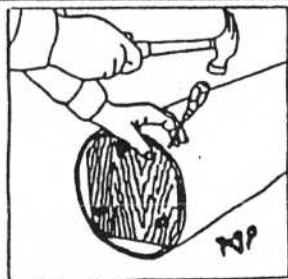

All four blocks are installed. Time to put in the tailgate.

97

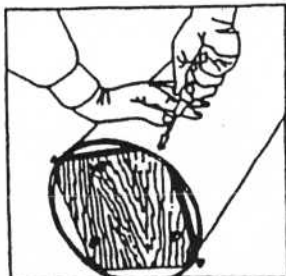

The tailgate should butt snugly against all four blocks so that it won't rock when pushed alternately on opposite corners.

98

Making pilot holes for the four tailgate screws. The screws go through the cardboard tube and into the wood.

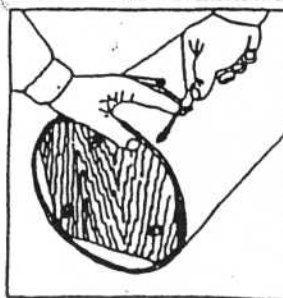

99

Screwing in the tailgate at all four corners. (Check the fit of the tailgate before installing the mirror.)

Installing The Mirror

100

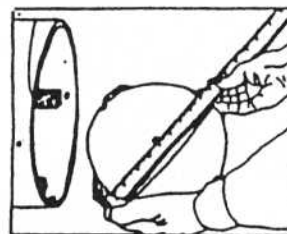

When the tailgate is snug, we are ready to install the mirror.

101

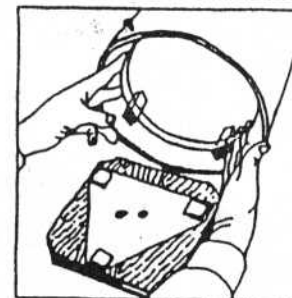

**CAUTION:
HANDLE
YOUR
MIRROR
INDOORS OR
IN THE
SHADE!!!**

102

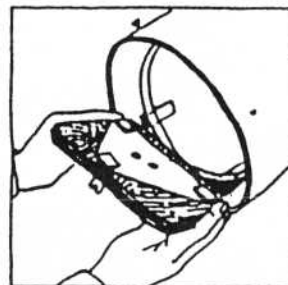

Carefully place a sticker or decal at the exact center of the mirror. This sticker will be used later to align both the diagonal mirror and the objective mirror.

103

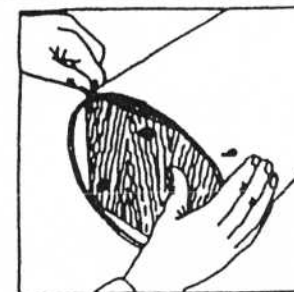

Installing the mirror.

104

After installing the mirror, close up the tailgate...

105

...and screw the tailgate in. Now we are ready to build the tube box and rocker.
